World Wide Endo March 2019 - Vancouver

March 30
11:00AM
-1:00PM

Meeting place: BC Women’s Centre for Pelvic Pain and Endometriosis

Endometriosis is a very painful and destructive disease. 1 in 10 women have endo.

There is very little research done. Treatments do exist but are not often enough. Join us to march for awareness.

There is no cure. Together let’s help end endo.
